

SAUNAFIN CLEAR CEDAR VS CLEAR CEDAR

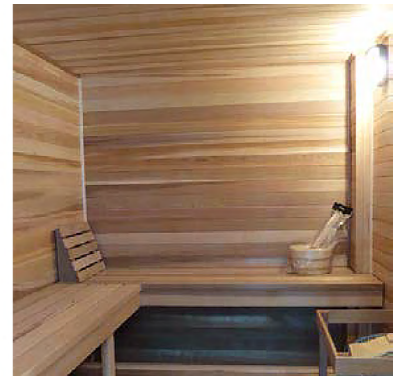

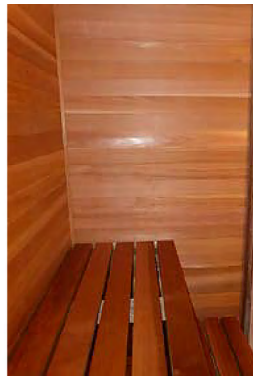

At SaunaFin, we pride ourselves on 'quality' and using only the best Western Clear Cedar available, to custom-build your sauna.

What qualifies and is classified as 'clear' by other sellers, does not meet our rigid SaunaFin standard. While all red cedar provides the pleasant fragrance we attribute to cedar, the grading process is much different in terms of defining what is considered premium wood. Many vendors allow for up to 10% knots in their wood and reduce their board thickness to 1/2", while here at SaunaFin, we work only with the best mills to deliver a "Sauna-Select" grade 11/16" 'virtually' knot free milled boards.

Our exceptionally high standard provides you with the highest quality finish available on the market, assuring your custom-built sauna is as close to perfection as we can get, so you can focus on enjoying not only the beautiful smell of cedar but an unmatched premium finish as well.

SAUNAFIN CLEAR CEDAR

Here are some pictures. But you don't have to believe us. Just check out pictures of Clear Cedar sauna kits sent to us by customers or posted on Google.
