DO-IT-YOURSELF SAUNA MATERIAL KIT

SAVE MONEY, SAVE TIME, BUILD A BETTER SAUNA

WE SUPPLY

SPECIFIED FULL LENGTHS - NO SEAMS

- 1×4 tongue & groove CLEAR, Western red cedar for walls and ceiling
- CLEAR cedar for all benches
- Corner molding & inside door casing
- CWS model sauna heater with black frame and stainless steel shell
- TPT3 control with 60 minute timer
- Foil vapour barrier
- Slide vent cover
- Vapour proof sauna light
- All necessary screws and nails
- Pre-hung, cedar framed, full-length glass door. Window is 16"×64" tempered, thermopane insulated sealed unit

YOU SUPPLY

- 2×4 SPF spruce studs for framing
- 3.5" fiberglass insulation
- Exterior finish i.e. drywall

ADVANTAGES TO A MATERIAL KIT

The Material Kit provides all the special components necessary to properly and easily build your sauna. The kit provides specific cedar lengths. Builder supply warehouses and lumber yards generally carry only 8' or random lengths which creates a lot of waste. The kit also includes such items as cedar molding and door casing, which are not readily available.

VERSATILITY

It is easy to customize a sauna material kit. If the sauna is part of a larger renovation; such as a finished basement, or addition, it is easy to incorporate the sauna kit into whatever space is available. The sauna can be installed to suit particular settings; for example, exterior can be drywall and painted to match the outside decor of a bathroom.

HOW LONG WILL IT TAKE?

The installation time will of course vary somewhat with the size of the sauna. On average, the sauna kits are installed in 14 - 20 hours. With the specified lengths, pre-cut moldings, and pre-hung door, you will save at least 4 - 8 hours on your installation time.

IS THE SAUNA KIT PRE-CUT?

No, while we do offer that service, we do not recommend it. The cedar will come in the next nearest foot. If the sauna has a 5'-9" wall, we will provide a 6'-0" length. This allows you to trim the boards yourself to guarantee the best fit. You can make allowances if the framing is not quite square or level.

DO I HAVE TO USE CEDAR?

While other materials are occasionally used, cedar is by far the most popular, most attractive, and most practical. Cedar has a mild, pleasant fragrance that many people associate with saunas. Cedar's particular properties allow it to expand and contract. This is important in a sauna where the wood is exposed to extremely high, dry temperatures, interspersed with blasts of humidity when water is splashed on the heater or the walls.

NOTHING COULD BE EASIER

With the Saunafin Material Kit, building a sauna is one of the simpler do-it-yourself projects. Our rule of thumb is: If you can erect the stud framing, you will have no problem installing the sauna kit. It is designed specifically for the do-it-yourselfer and renovator. The bench framing, heater guard, and moldings are pre-cut. If you have not built a sauna before, you will find the instruction booklet and drawings easy to follow.

QUALITY

Our Clear cedar material kits use only kiln-dried, clear, grade "A" & better, tongue & groove cedar. The cedar is over 1/2" thick to ensure strength and durability. Our most popular sauna kit has only 2 x 4 Clear cedar for benches and bench framing.

SAUNA DOORS

All sauna doors include thermopane, insulated, tempered safety glass.
Doors are pre-hung on a jamb. Custom sizes available

SAUNA ACCESSORIES

Make the most of your sauna experience by adding a few special sauna accessories, such as a bucket and dipper to splash a little water over the rocks or scented essence to add a luxurious aroma to your sauna experiences. We also offer a selection of thermometers, sand timers, sauna wraps, and other specialized sauna items.

SAUNACRAFT SAUNA HEATERS

Precisely engineered baffled construction provides enhanced air flow for quicker heat-up time and cost-saving efficiency.

CW Series sauna heaters can be mounted on a straight wall or in a corner. FM Series are floor mounted.

Premium #304 stainless steel dual shielding shell design.

Rugged construction for years of safe, low-cost, efficient sauna enjoyment.

Highest quality, low-watt density heating elements.

Expanded Mesh Rock Tray protects the heating element while providing maximum air flow.

Built-in high-temperature safety cut-off.

Safety certified.

SAUNA CONTROLS

TPT3 Control

(Standard) Thermostat, spring timer and pilot light

Electronic Control

(Optional) Quiet operation
No ticking noise

TYLO SAUNA HEATERS

TYLÖ

The heart of every sauna is the sauna heater. TYLO sauna heaters are widely renowned and greatly respected for their high-quality and distinct features - but not everyone knows all the reasons for this. That's why we'd like to take the opportunity to point out some of the most important benefits of the TYLO design and why the hottest range of sauna heaters on the market knocks all others cold.

Quickest heat-up time

Twin side chambers maximize the through-flow of air, minimize heat-up time, and economize on running costs. No other sauna heater uses less energy.

The lowest energy consumptions

Test after test confirms that TYLO is the most energy-efficient sauna heater.

The most even bathing temperature

A divided output is the secret behind the constant bathing temperature and lower energy consumption of a TYLO heater. Divided output means the heater elements cycle in stages. For the initial heat up, all the elements are on, then the elements cycle on and off in stages as needed to maintain an even temperature. Other heaters are either 100% on or completely off, resulting in a temperature swing. TYLO heaters maintain an overall higher and more consistent temperature.

Built-in humidifier

This unique TYLO feature further enhances your sauna bathing experiences.

Optimum water sprinkling

A deep, generously proportioned stone compartment, and direct contact between the stones and the heating elements ensure perfect water sprinkling with 100% vaporization.

Finest material quality

Only TYLO has a solid-cast top, inner casing and stainless steel stone compartment.

Best in test

Time and time again TYLO has scored top marks in Finnish sauna tests. TYLO was first awarded the coveted "Best in Test" accolade in competition with seven Finnish heaters in 1982. A test published in a Finnish magazine (*Kuluttaja* no.5, 1995) confirmed that TYLO also has the quickest heating-up time and lowest energy consumption. A SEMKO test in April 1999 confirmed this result, and also proved that the steam generating performance of TYLO heaters was unrivaled.

Safe to touch

Thermosafe soft touch covering ensures a low surface temperature - just 40°C on the front and sides of the heater.

TYLO SENSE SPORT

(control at bottom of heater)

Control panel with thermostat and mechanical timer integrated into the base of the heater.

The Sense models are a brand new sauna heater, combining sleek design with the reliable functionality and genuine quality of TYLO.

Removable compartment for fragrant essences.

TYLO SENSE PLUS

with PURE 2.0 or ELITE control

The TYLO Sense Plus uses the separate control mounted outside the sauna or inside at less the 3" above floor level.

TYLO SENSE COMBI

with PURE 2.0 or ELITE control

The TYLO COMBI is quite simply the most sophisticated sauna heater on the market - the only heater that lets you enjoy traditional saunas and steam or herbal saunas (Tylarium) in one and the same room. The choice is yours - a traditional sauna at 68-90°C (155-194°F) in a relative humidity of 5-35%, or a steam sauna at 45-65°C (110-150°F) with steam at 40-65% humidity. You can even add a little spice to your bathing with a refreshing herbal sauna. The heater has built-in dispensers for dried or fresh natural herbs and liquid essences, so you can blend your favorite fragrance.

The COMBI has all the hallmark features of a quality TYLO heater, plus a number of special technical innovations: electronic programming of bathing mode (time, temperature and humidity), stainless steel water reservoir, 10 hour pre-set function and a 1 hour bathing time. Automatic and manual on/off, electronic low-water cut-off; and automatic drying function after completion of the steam sauna cycle.

Residential Models	Kw	Volts / Phase	Amps / Breaker*	Wire*	Cubic Feet	
					Min.	Max
431	4	240 / 1	18.3 / 30	10	70	210
531	5	240 / 1	29.2 / 40	8	140	320
631	6	240 / 1	34.6 / 40	8	175	440

* Breaker and wire size is recommendation only. Confirm with your licensed electrician.
